

Chain of Custody Certification

Chain of Custody certification verifies that companies have an accounting system to trace the flow of wood from certified forests through a company's facilities. This accounting system must meet the requirements of a particular certification standard and allows companies to identify the proportion wood in the end product that originated from certified sources.

Carrier Lumber Ltd. is committed to Chain of Custody Certification. To this end, Carrier Lumber Ltd. has implemented, and will maintain, operational controls and systems to meet the requirements specified in the PEFC standard for chain of custody of forest based products, May 24, 2013, 2002:2013.

If you have any questions regarding Chain of Custody Certification please contact Carrier Lumber Ltd.
